PERK PERIOD SELECTION INFORMATION

Students will select their Perk period classes within the first three weeks during second period. On this day, students will stay in their first period classes through the end of the second period. All students should have one class selected for each day of the cycle (1-6) by the end of the period.

Please review this catalog and use the template that is located at the back to record your preferences for the first semester of Perk period. Please note that it is extremely important to record the name of the course in addition to the course number. This is because the courses are listed in alphabetical order in the actual Skyward selection screen.

It is also advised that students log into their Skyward account prior to the scheduling days to see if they have been pre-loaded into any classes. These additions may take place up until the day of scheduling so it is a good idea to check back when planning your choices and again prior to the actual selection.

When using this catalog, please note that each section begins with the schedule for the activities within that particular section. In each table, the activity listed is held on the cycle day(s) that are marked by an "X." If there is no "X," the activity is not offered this semester. Below the schedule is a description of each course and an indication of whether that course is an academic or interest course. Each section of a course is scheduled for one day per cycle unless noted in the course description. Students are allowed to select multiple sections of a given course.
